

January, 2025

Wessels Company
101 Tank Street
Greenwood, IN 46143

Subject: 2025 PRICING NOTICE

March 1st, 2025, product pricing will see modest list price increases (~5%) while special pricing multipliers remain the same.

As always, Wessels remains dedicated to offering competitive pricing for our wide range of product offerings in the new year, which now include **Thermal Energy Storage Tanks (TES)** for installations like data centers and new smart tank devices like the **WessGuard PRO** for active monitoring of water level, air moles, and pressure.

Wessels continues to offer pioneering product lines like the **Rx and Full-Flow** thermal expansion tanks, which use mixing and antimicrobial plating to combat the growth of biohazardous bacteria, and **WesMag Filtration** adaptations that drastically increase the life of filtration vessels, air and dirt separators, and other HVAC and plumbing equipment.

Thank you for your continued business and we look forward to growing together in Q1 of the new year.

Sincerely,

James J. Fuller
President
Wessels Company
